• **JavaScript** • **TypeScript** • **React js** • **python** • **Node js** • **MySql** • Express js • Git • HTML & CSS
• **tailwind css** • Mongodb • REST API • DSA • communication

Projects

IMDB Clone || **Project Link** || **Github Link**
- Developed a movie database application using Next.js and The Movie Database (TMDB) API.
- Implemented features to display movie details including synopsis, release dates, and more.
- Utilized Next.js for server-side rendering and optimized performance.

Reddit Application || **Project Link** || **Github Link**
- Developed a web application using React and TypeScript to fetch and display posts from the ReactJS subreddit via the Reddit API.
- Key features include dark mode for a comfortable viewing experience and a fully responsive design to ensure usability across various devices.

Ticket app || **Project Link** || **Github Link**
- Functionality for raising tickets with tracking for progress, priority, and status.
- Ticket management system designed to streamline issue resolution.
- User-friendly interface for quick navigation and control over ticket lifecycle.
